

Application No.: 09/737,536

REMARKS/ARGUMENTS

As agreed with the Examiner, Claims 1, 14 and 27 are amended to more particularly point out the claimed invention. The claims are amended to recite "wherein the intensity values indicate nucleic acid hybridization". The support for this amendment can be found in, for example, pages 13, line 17. The claims are also amended to define the subscripts i and k . This amendment is supported by the specification, for example, at page 23. No new matter is presented by the amendments.

Attorney's Statement of the Substance of the Interview under 37 CFR §1.1333

Applicants' attorney thanks the Examiner for a *telephonic* interview on November 16, 2004. Applicants' attorney Wei Zhou and Examiner Ardin Marscheel participated in the interview.

Claims 1-31 are rejected under 35 USC Section 101 (nonstatutory subject matter). The Examiner indicates that it was not clear whether the term intensity values are hybridization related. Applicants' attorney and the Examiner then discussed possible amendments to clarify and agree with an amendment to recite "wherein the intensity values indicate nucleic acid hybridization".

The Examiner also pointed out that Claim 1, 14 and 27 do not define subscripts i and k , even though they are defined in the specification. The Examiner suggested an amendment to add the definition of the subscripts.
